

Activflo Solo installed in-line with shower head (example)

Product Description:

The ActivFlo is a No-Salt Water Conditioner. Hard water is a common water condition that is a result of calcium and magnesium in the water supply. Effects of hard water include limescale buildup, reduced water flow, and reduced heating efficiency. The ActivFlo imposes a catalytic action as water flows through, that causes calcium bicarbonate to form into an insoluble aragonite crystal. These crystals do not have the same bonding properties as calcium which means they won't stick to pipework, heating elements, fixtures, etc.

The ActivFlo Solo water conditioner has been specifically designed and engineered for independent component protection with applications in lower flow requirements. The same unique alloy coil provides the catalytic method for water conditioning. Calcium bicarbonate forms into aragonite which cannot adhere to surfaces. Applications include:

- Shower Heads
- Ice Makers
- Coffee Makers
- Beverage Dispensers
- Water Fountains
- R/Vs, Campers, Boats

Product Benefits:

- Maintains efficiency of water fixtures and equipment
- Improves operation by removing existing scale
- Small installation footprint
- Flowrates down to 0.7 GPM
- No power required
- Fit and forget installation
- Quality stainless steel housing
- Product warranty of 12 years
- Male/Female NPT for in-line installation

Product Range:

ZAF012MF 1/2" MNPT x 1/2" FNPT Activflo Solo

Technical Specifications:

Maximum Operating Temperature: 210 F
 Maximum Operating Pressure: 150 psi
 Connections: Male / Female NPT
 Optimum Flow Rates: 0.7 - 3.6 GPM

Dimensions (inches):
