

ZMIX Tank Maximizer

Thermostatic Mixing Valve

The Zilmet Intamix Maximizer is installed on a water heater and will allow the water heater to safely operate at a higher set point. This delivers:

1. More usable hot water so your 50 gallon water heater acts like an 80 gallon water heater
2. Higher temperatures to kill water-borne bacteria such as Legionella

Features

- Meets two different ASSE standards
 - ASSE1070 with factory preset of 120F
 - ASSE1017 with adjustment for hot water distribution systems
- Temperature gauge and stainless steel hose
- Internal non-return valve with stainless steel mesh screen to help prevent debris from entering valves inner components

Benefits

- Tank connection union allows valve orientation towards work direction
- Two recirculation loop ports for ultimate flexibility in installation
- Temperature locking hex for tamper resistance
- Angled body for convenient accessibility during maintenance

Specifications

Temperature Range:	95° F - 140° F
Factory Set Temperature:	120° F
Minimum Flow Rate:	1.2 GPM
Max Inlet Temperature:	195° F
Max Inlet Pressure:	150 psi

Pressure Drop Curve
