For use with traditional water heaters and tankless water heaters.

ZAFL2234 is Certified by IAPMO R&T to NSF/ANSI/CAN 372 for Low Lead Content

Free ActivFlo Lite counter display box with every purchase of 10 or more!

TANKLESS PROTECTION KIT

Item Number	Description	Optimal Flowrate (GPM)	Connection Size	Weight (Lbs)	Carton Dimensions (LxWxH)	UPC Code	Standard Lead Time (Days)	List Price (US \$)
ZTPK-O34	Tankless Protection Kit	4.2 – 12.4	3/4" FNPT	2.8	10" x 8" x 4"	00810183150351	5	\$819.00

Includes: ActivFlo Lite Scale Inhibitor

ZEP1 Thermal Expansion and Surge Protector

ZILMET Maximizer (ZMIX)

The Maximizer is installed on a water heater and will allow the water heater to safely operate at a higher set point. Two advantages are: (1) more useable hot water from your water heater, (2) higher temperatures kill water-borne bacteria.

NOTES:

Temperature Adjustment Range: 95-140° F
Factory Preset Temperature: 120° F
Maximum Inlet Temperature: 195° F

Maximum Inlet Pressure: 150 psi
Maximum Inlet Pressure (dynamic): 75 psi
Minimum Flow Rate Requirement: 1.2 gpm
Meets ASSE1070 ASME A112.1070 / CSA B125.70
Meets ASSE1017 CSA B125.70
NSF/ANSI 372 Certified
NSF/ANSI STD61 Certified
Massachusetts PHCC listed
To estimate hot water gained, see our Zilmet Tank Calculator on our website.

connection	stainless steel
diaphragm	butyl
color	grey

Operating Conditions	
max. operating pressure	150 psi
operating temperature	210° F
factory precharge	12 psi
warranty	5 years

TECHNICAL FEATURES:

- Designed for low temperature radiant floor systems
- All radiant tanks have a polypropylene liner to prevent corrosion due to oxygen entering the system
- All tanks come with a stainless steel connector
- Suitable for use with glycol

For Hydronic Use Only / Not For Potable Water

ZILMET Expansion Tank Accessories

TANK T KITS

ZTK-1

- ZILMET Tank T Kit – No Lead
- Tank T Fitting Package with ZTT -1 for 1" connection.

List Price: \$230.68

ZTK-2

- ZILMET Tank T Kit – No Lead
- Tank T Fitting Package with ZTT -2 for 1 1/4" connection.

List Price: \$268.68

PACKAGE CONTAINS

- No Lead Brass Tank T with Swivel Union Nut
- 40/60 Pressure Switch
- No Lead Pressure Gauge 0-100 psi
- 1/4" NPT X 3" No Lead Brass Nipple
- 1/2" NPT No Lead Brass Boiler Drain with Hose Bibb
- 1/2" No Lead Pressure Relief Valve

ULTRA PRO/INOX PRO-REPLACEMENT MEMBRANES	Standard Lead Time (Days)	List Price (US \$)
Replacement membrane for 24L Ultra Pro Tank	5	\$341.80
Replacement membrane for 60-80L Ultra Pro Tank	5	\$385.20
Replacement membrane for 100L Ultra Pro Tank	5	\$424.40
Replacement membrane for 200L Ultra Pro Tank	5	\$786.00
Replacement membrane for 300L Ultra Pro Tank	5	\$980.80
Replacement membrane for 500L Ultra Pro Tank	5	\$1,598.24

TANK T UNION

ZTT-1

1" connection size
List Price: \$98.00

ZTT-2

1 1/4" connection size
List Price: \$137.20

STAINLESS STEEL FLEX CONNECTORS

Our new connector allows for easier and faster installation in tank replacement applications.

Item Number	Length	Item Weight (Lbs)	Connections	Standard Lead Time (Days)	List Price (US \$)
ZFLEX 1-12	12"	.40	1" NPT female	5	\$78.70
ZFLEX 1-18	18"	.40	1" NPT female	5	\$84.30
ZFLEX 2-18	18"	.60	1 1/4" NPT female	5	\$50.02

- Max working pressure: 125 psi
- Max working temp: 240° F
- UPC Certified
- AB 1953 Compliant
- Complies with NSF61
- Meets ASME A112.18.6

MOUNTING BRACKETS FOR TANKS UP TO 6.3 GAL

ZWH B \$78.70

ZWH HP \$84.30

ZWH M \$50.02

UNION CONNECTION

Union connection with a two way check valve for hydronic use only

ZFT-U \$64.00

ZILMET Zil-Kit (ZBTK) Boiler Trim Kit Package

This kit enables the installer to carry the essential components for a heating system in one compact carton.

Available in NPT and SWT connections

The Assembly Includes

- 4.8 gal or 6.3 gal hydronic expansion tank
- Microbubble eliminator
- Multi isolation valve
- Backflow prevention device
- Boiler fill valve with pressure gauge
- Brass connector nipples (2)

FEATURES AND BENEFITS

- 4.8 gal or 6.3 gal hydronic expansion tank included in package
- NPT and SWT connections
- All in one package solution
- Multi isolation valve
- Drain off outlet for easy system servicing
- Microbubble eliminator
- For use with up to 50% glycol

Boiler Trim Kit and Accessories for Hydronic Use Only / Not For Potable Water

ZILMET Boiler Accessories

MICROBUBBLE ELIMINATOR

ZILMET Microbubble Eliminator is designed to vent trapped air within sealed systems at pressures up to 150 psi. This helps to maintain optimum system efficiency, improves energy usage, reduces system corrosion, eliminates noise from system pipe work and helps to extend the working life of system heat pumps.

Item Number	Product Range Description	UPC Code (505514)	Standard Lead Time (Days)	List Price (US \$)
ZU0002	1" NPT	3759280	5	\$570.24
ZU0003	1¼" NPT	3759297	5	\$820.80
ZU0004	¾" SWT	3759303	5	\$552.96
ZU0005	1" SWT	3759310	5	\$596.16
ZU0006	1¼" SWT	3759327	5	\$939.60

ZU0012	2" NPT	3789669	5	\$1,316.52

BOILER FILL VALVE

ZILMET Boiler Fill Valve is a crucial part of a boiler trim kit. Designed as an automatic filling unit which reintegrates fluid into the closed systems in the event of lost fluid deaeration (process produces steam/gas mixture that develops continuously in closed looped heating circuits.)

FEATURES AND BENEFITS

- Isolation valve standard
- Easy to use "dial up" adjustment head
- Internal check valve prevents the return of potentially contaminated fluid

Item Number	Product Range Description	UPC Code (505514)	Standard Lead Time (Days)	List Price (US \$)
ZU0007	½" Boiler Fill Valve	3759334	5	\$330.48

Operating Conditions	Boiler Fill Valve	Microbubble Eliminator
max. operating pressure	150 psi	150 psi
max. temperature	230° F	230° F
inlet connections	½" NPT	¾" NPT, 1" NPT, 1¼" NPT
adjustment range	7.5 to 100 psi	¾" SWT, 1" SWT, 1¼" SWT

Boiler Trim Kit and Accessories for Hydronic Use Only / Not for Potable Water

BACKFLOW PREVENTION DEVICE

The ZILMET Backflow Prevention Device is designed to prevent potentially polluted heating system fluid back flowing into the domestic water system

FEATURES AND BENEFITS

- Drainage point to visibly identify system operating faults
- Internal stainless steel filter
- NPT or SWT connection options available
- Robust brass construction

Item Number	Product Range Description	UPC Code (505514)	Standard Lead Time (Days)	List Price (US \$)
ZU0008	1/2" Backflow Prevention Device NPT	3759341	5	\$273.02
ZU0009	1/2" Backflow Prevention Device SWT	3759358	5	\$292.03

Operating Conditions	
max. operating pressure	175 psi
max. temperature	32° F to 210° F
inlet connections	1/2" NPT, 1/2" SWT

MULTI ISOLATION VALVE

ZILMET Multi Isolation Valve is the ultimate valve for complete fluid control. The valve allows complete isolation for the inlet flow, expansion vessel and live system providing the ideal component for boiler trim kit assemblies

FEATURES AND BENEFITS

- Multiple isolation points
- Anti-tamper locking handle

Item Number	Product Range Description	UPC Code (505514)	Standard Lead Time (Days)	List Price (US \$)
ZU0020	1/2" NPT Multi Isolation Valve	3759372	5	\$250.56

Operating Conditions	
max. operating pressure	150 psi

ZILMET Magnetic Filter and Dirt Strainer (ZMF)

MAGNETIC FILTER AND DIRT STRAINER - PROTECTS HYDRONIC SYSTEMS AND COMPONENTS

Zilmet ZMF Magnetic Filters provide magnetic and mechanical separation across a broad range of applications; including boilers, heat pumps and chilled water systems.

FEATURES:

- Engineered for best-in-class efficiency, offering superior flow rates with less energy consumption
- Powerful magnetite capture and removable 304L stainless strainer for dedicated sludge protection
- Patented, quarter-turn bypass isolates high capacity filter housing for fast service and system dosing
- Detachable, swivel filter body rotates to accommodate any piping angle
- Rugged brass connection hub includes NPTF and PRESS connections so you're ready for every job with half the inventory
- 5 Year Warranty

PRODUCT RANGE AND DIMENSIONS

Item Number	Weight (Lbs)	Connection Size	Shipping Dimensions (LxWxH)	UPC Code	Standard Lead Time (Days)	List Price (US \$)
ZMF-100	3.8	1" NPTF and 1" Press	7.8"x3.9"x12.8"	5055143758818	7	\$874.80
ZMF-125	3.8	1 1/4" NPTF and 1 1/4" Press	8.1"x3.9"x12.8"	5055143758825	7	\$945.65

*Includes NPT & Press conections

Technical Specification	
max. operating pressure	90 psi
max. temperature	190° F
fluid compatibility	Water or Glycol Mix up to 50%
magnet performance	Neodymium 11,000 Gauss; ASTM A977

For Hydronic Use Only / Not For Potable Water

ZILMET MAG PRO (ZM)

Magnetic Systems Hub

TECHNICAL FEATURES

- Various inlet connection sizes ranging from 1/2" NPT to 2" NPT
- Quick and efficient servicing schedule
- Self closing filter basket for easy debris removal
- Multiple inlet configurations to suit many installations
- Manual and automatic air venting
- Stainless steel filtration down to 100 Microns
- 5 year manufacturer's warranty

ZILMET MAG

ZILMET Plate and Frame Heat Exchanger

GENERAL INFORMATION

- **Applications:** The ZILMET plate heat exchanger has many applications. These include: production of sanitary hot water, decoupling of thermal circuits, district heating systems, recovery of heat coming from industrial process, cooling or heating of alimentary fluids (milk, beer, wine, etc), cooling of industrial machineries, heating of water for swimming pools and solar systems.
- **Advantages:** In every situation which requires a thermal exchange between two fluids, ZILMET plate heat exchangers are the right choice. The high efficiency, the long life, the low price, the small dimensions, the high modularity, the easy maintenance and the high reliability are some of the most important advantages of ZILMET plate heat exchangers.

TECHNICAL FEATURES

- **PLATES** The plates are manufactured with 316 L stainless steel .0197 inches thick. This kind of material and thickness allows a smooth and quick transition to assure great corrosion resistance.
- **GASKETS** ZILMET plate heat exchangers are equipped with glued EPDM gaskets with a maximum working temperature of 284° F for particular applications, such as gasoline and oils, they can be equipped on request with nitril glued gaskets, for a maximum working temperature of 230° F.
- **FRAMES** The frames are manufactured with silver painted carbon steel. The thickness is designed for the respective working pressure.

- **TESTS** 100% of ZILMET plate heat exchangers are tested before shipment at 1.5 times the maximum working pressure.
- **TITANIUM PLATE AND FRAME HEAT EXCHANGERS AVAILABLE UPON REQUEST**
- **CUSTOM HEAT EXCHANGERS ARE AVAILABLE UPON REQUEST. PLEASE CONTACT US FOR CUSTOM PRICING.**

ZILMET Brazed Plate Heat Exchanger

HEATING SYSTEMS AND GENERAL APPLICATION

ZILMET heat exchangers, made of high quality 316 stainless steel and pure copper are particularly suitable to a wide variety of applications, including:

- Boiler components
- Hot water production with tank, hot water immediate production
- Traditional boiler heating
- Pool heating
- Thermal circuits decoupling
- District heating
- Solar system
- Full line available
- Ideal for hydronic and refrigeration use

REFRIGERATION/AIR CONDITIONING FIELD

ZILMET has recently extended its range of brazed plate heat exchangers introducing a range of products dedicated to the refrigeration and air conditioning area. The new series has been designed and built for evaporation and condensing units; they are also compatible with various types of refrigerants, including high-pressure ones such as 'R410A'.

Please contact us for more information on these refrigeration heat exchangers.

ZILMET heat exchangers are in full compliance with all safety and functionality requirements of Directive 97/23 / EC on pressure equipment.

**CUSTOM SIZES AND CONFIGURATIONS
AVAILABLE UPON REQUEST.**

STANDARD ON ALL ASME RATED EXPANSION TANKS

- 1** Pressure Gauge included and integrated
- 2** Bladder integrity monitor included
 - Allows for fast, accurate assessment of the tanks integrity. The indicator will change color from white to red in case of a compromised bladder or diaphragm
- 3** Easy Access Air Valve at work level on the side of the tank
- 4** Protective guard mount to prevent damage when shipping and installing
- 5** Higher factory pre-charge (at 40 psi) so it can be easily adjusted in the field as needed

OTHER ASME ACCESSORIES AND UPGRADES INCLUDE

- Seismic Restraints
- Saddles to mount the tank horizontally
- Clips to secure a tank into place
- Available in 304 Stainless Steel
- Available in 316 Stainless Steel

– See page 25 for pricing.

ZILMET offers a full line of ASME rated expansion tanks for all applications. The design and construction is manufactured to conform to ASME Section VIII, Div I.

ZTXA-200-FF	150	53	53	24" x 24" x 43"	1 1/2"	220.0	\$12,193.97
ZTXA-300-FF	150	79	79	24" x 24" x 55"	1 1/2"	236.0	\$16,334.23
ZTXA-400-FF	150	106	106	30" x 30" x 49"	1 1/2"	315.0	\$18,706.37
ZTXA-500-FF	150	132	132	30" x 30" x 57"	2"	347.0	\$19,477.03
ZTXA-600-FF	150	158	158	30" x 30" x 65"	2"	378.0	\$21,756.60
ZTXA-800L-FF	150	211	211	32" x 32" x 76"	2"	503.0	\$24,499.03

The ZTXA-FF design incorporates a unique flow-through design that promotes fluid mixing. Mixing of the fluid inside the bladder tank disrupts stagnant water, preventing growth of harmful bacteria colonies. The water is contained in a heavy-duty butyl bladder, preventing tank corrosion and water-logging.

REMOVABLE BLADDER TANK - ASME - 150 PSI

ZILMET Air and Dirt Separators (ZADS) ASME Rated

ZILMET Air and Dirt Separators (ZADS) are designed to eliminate entrained air and separate debris associated with start-up and continuous operation of any hydronic system. The design incorporates a removeable end cover for access to the coalescing media, a skim valve (optional) used to eliminate floating debris, and an air vent (optional) to automatically release air from the separator. The design and construction is manufactured to conform to ASME Section VIII , Div I.

Standard	
material	carbon steel
coalescing media	stainless steel
max. design temperature	250° F
max. design pressure	150 psi

Options	
material	stainless steel
coalescing media	copper mesh
optional magnetic filtration to remove ferrous particle	

ZADS Trim Package List Price \$265.00	
blow down valve – 1”	bronze
skim valve – 1/2”	bronze
air vent – 3/4”	cast iron

FOR HYDRONIC USE ONLY / NOT FOR POTABLE WATER

Air and Dirt Separator (ZADS)

Non Removable Air and Dirt Separator (ZADSN)

ZILMET Hot and Cold Water Buffer Tanks (ZCBT & ZHBT) ASME Rated

ZILMET ASME Chilled Water Buffer Tanks (ZCBT) are designed for use in chilled water systems with insufficient water volume capacity, in relation to the chiller capacity. The ZCBT Series Buffer Tanks effectively increase system volume and reduce the rate of change (ΔT) in the return water, resulting in improved temperature control, consistent system operation and controlled compressor cycling. The design and construction is manufactured to conform to ASME Section VIII, Div 1.

STANDARD FEATURES FOR (ZCBT) & (ZHBT)

- ASME rated (125 psi at 450° F)
- Integral Ring Stand for Vertical Installation
- Top Air Vent Connection
- (ZCBT) only: Internal Baffle

Features (ZCBT) and (ZHBT)	
material	carbon steel
max. pressure	125 psi
max. temperature	450° F
finish	red oxide primer
auxilliary connections	¾" NPT top vent; 1" NPT bottom drain

(ZCBT) CHILLED WATER BUFFER TANKS

ZILMET HOT WATER BUFFER TANKS (ZHBT)

ZILMET ASME Hot Water Buffer Tanks (ZHBT) are designed for use with today's high efficiency systems that incorporate small modular low mass boilers. A properly sized ZILMET Hot Water Buffer Tank adds necessary thermal mass to the system to dampen fast transactions and minimize boiler cycling that occurs during zero or low domestic load conditions. The design and construction is manufactured to conform to ASME Section VIII , Div I.

OPTIONAL FEATURES FOR (ZCBT) & (ZHBT)

- 1/2" Elastomeric Insulation
- Weather Resistant Coating
- Available with 1" to 2 ½" NPT Connections
- 1"- 20" flange connections also available

(ZHBT) HOT WATER BUFFER TANKS

Item	Gallons	Diameter (In)	Height (In)	Weight
ZHBT-120	120.0	30	60	248
ZHBT-210	210.0	30	75	459
ZHBT-300	300.0	30	72	781

Available in either 2 or 4 ports

Consult technical team for pricing and availability for higher working pressures and larger system connections. Prices and lead times available upon request.

ZILMET Tangential Air Separators (ZPA) ASME Rated

Natural centrifugal forces allow heavier, air-free water to move towards the outer edges, while entrained air is captured by the stainless steel collection tube and released to the top of the separator. This air is then able to release from the system. Water exits near the bottom of the unit bubble-free which protects the system against noise, blockage, and damage commonly caused by entrained air.

ZPA TANGENTIAL AIR SEPARATORS

WITHOUT STRAINER

Notes: Materials = Steel;
Maximum Pressure =
125 psi; Maximum
Temperature = 450°F;

ZILMET Hydraulic Separators (ZPSA & ZPSAV) ASME Rated

ZILMET Primary/Secondary Header hydraulic separations are used in heating and cooling systems that require the primary and secondary loop of the system to be interlocked. The primary and secondary headers (ZPSA) are designed to keep both connected hydraulic circuits completely independent from one another and to provide a means for system air elimination. The ZILMET Primary/Secondary Header with Air/Dirt Separator (ZPSAV) builds on that functionality with the inclusion of internal coalescence coils in the tank that eliminate entrained air and separate debris associated with start-up and maintenance of the system. As a result, the ZPSAV replaces the need for an air/dirt separator. The design and construction is manufactured to conform to ASME Section VIII, Div I.

STANDARD FEATURES

- Separates Primary and Secondary loop hydraulically
- Removes air from system
- Separates and collects sediment
- Easy installation
- **Optional magnet available at extra charge**

Features	
material	stainless steel
max. pressure	150 psi
max. temperature	450° F
finish	finish primer painted exterior

Legs come standard with 6" connection models and above. Consult technical team for pricing and availability for higher working pressures and larger system connections.

For Hydronic Use Only / Not For Potable Water

ZILMET Shock and Surge Tanks (ZSSA) ASME Rated

Shock & Surge Tanks are specially designed hydro-pneumatic tanks used to absorb the harmful water hammer pressure wave in a piping system. When properly sized, these tanks are designed to capture the kinetic energy wave of a quick-closing valve (or other offending fixture) and limit the pressure spike that is otherwise created. Typically used in water well systems, municipal water distribution lines, pressure booster systems, and industrial water distribution systems.

ZSSA SHOCK & SURGE TANKS

REMOVABLE BLADDER TANK

ZILMET Glycol Make-Up (ZGMP) ASME Rated

Glycol make-up packages function by automatically supplying pressurized water, or water/glycol mixture to a closedloop space heating, chilled water, snowmelt, radiant heating, or process control system. The engineering package is designed to ensure that critical minimum system pressure levels are maintained. Benefits include preventing major floods in the event of a system rupture, eliminating the need for a backflow prevention system, protecting the system from freezing by utilizing a predetermined solution, ensuring EPA compliance, and maintaining pressure within the system. Included is a solution reservoir and a pump with control for precise metering.

ZGMP – SINGLE SYSTEM PACKAGE
